Java Program Execution Steps

1. Type the Java Program in Notepad and save in any user directory

    eg.   E:\Test\Demo.java

2. Go to Command Prompt and change the directory location

   **eg.   cd E:\Test**

3. Set Path to Java Installed Directory

    E:\>Test> set path = "c:\Program Files\Java\jdk1.8.0_111\bin"

4. Compile and Run the Java Program

    E:\>Test> javac Demo.java

    E:\>Test> java Demo

```
class Demo{
        public static void main(String args[]){

                System.out.println(" Welcome ");

        }
}
```

```
C:\Windows\system32\cmd.exe                                    _  □  ×
